The information below summarizes the percentage of income that was derived from foreign sources with regard to certain BlackRock closed-end funds (each, a "Fund"). The foreign source income has taxes associated with it that were paid by each Fund to various foreign jurisdictions. Each Fund listed below has qualified to "pass-through" the foreign taxes to its shareholders. Accordingly, you may either deduct your portion of the taxes in computing your taxable income or take a credit for such taxes against your tax liability. These deductions or credits may be subject to limitations under the tax law. Your portion of the foreign taxes have been included on your Form 1099-DIV. The information below is provided to assist you in computing your foreign tax credit.

Please consult your tax advisor regarding the appropriate treatment of foreign source income and foreign taxes.

¹ To determine your portion of foreign source qualified dividends, other foreign source income and total foreign source income, multiply the dollar amount of your ordinary dividends by the percentage indicated.

² Represents the portion of your qualified dividends that was derived from foreign sources. As a result of the lower tax rates on qualified dividends, these amounts may be subject to certain adjustments before they are taken into account for purposes of computing your foreign tax credit.
